## Legal Notices

We offer information as a service to you. The provided information is based on your requirements and we make every effort to ensure its quality. You agree that you are responsible for using independent analysis and evaluation in designing intended products, and we provide reference designs for illustrative purposes only. Before using any hardware, software or service guided by this document, please read this notice carefully. Even though we employ commercially reasonable efforts to provide the best possible experience, you hereby acknowledge and agree that this document and related services hereunder are provided to you on an "as available" basis. We may revise or restate this document from time to time at our sole discretion without any prior notice to you.

## Use and Disclosure Restrictions

### License Agreements

Documents and information provided by us shall be kept confidential, unless specific permission is granted. They shall not be accessed or used for any purpose except as expressly provided herein.

### Copyright

Our and third-party products hereunder may contain copyrighted material. Such copyrighted material shall not be copied, reproduced, distributed, merged, published, translated, or modified without prior written consent. We and the third party have exclusive rights over copyrighted material. No license shall be granted or conveyed under any patents, copyrights, trademarks, or service mark rights. To avoid ambiguities, purchasing in any form cannot be deemed as granting a license other than the normal non-exclusive, royalty-free license to use the material. We reserve the right to take legal action for noncompliance with abovementioned requirements, unauthorized use, or other illegal or malicious use of the material.

## Trademarks

Except as otherwise set forth herein, nothing in this document shall be construed as conferring any rights to use any trademark, trade name or name, abbreviation, or counterfeit product thereof owned by Quectel or any third party in advertising, publicity, or other aspects.

## Third-Party Rights

This document may refer to hardware, software and/or documentation owned by one or more third parties ("third-party materials"). Use of such third-party materials shall be governed by all restrictions and obligations applicable thereto.

We make no warranty or representation, either express or implied, regarding the third-party materials, including but not limited to any implied or statutory, warranties of merchantability or fitness for a particular purpose, quiet enjoyment, system integration, information accuracy, and non-infringement of any third-party intellectual property rights with regard to the licensed technology or use thereof. Nothing herein constitutes a representation or warranty by us to either develop, enhance, modify, distribute, market, sell, offer for sale, or otherwise maintain production of any our products or any other hardware, software, device, tool, information, or product. We moreover disclaim any and all warranties arising from the course of dealing or usage of trade.

## Privacy Policy

To implement module functionality, certain device data are uploaded to Quectel's or third-party's servers, including carriers, chipset suppliers or customer-designated servers. Quectel, strictly abiding by the relevant laws and regulations, shall retain, use, disclose or otherwise process relevant data for the purpose of performing the service only or as permitted by applicable laws. Before data interaction with third parties, please be informed of their privacy and data security policy.

## Disclaimer

- a) We acknowledge no liability for any injury or damage arising from the reliance upon the information.
- b) We shall bear no liability resulting from any inaccuracies or omissions, or from the use of the information contained herein.
- c) While we have made every effort to ensure that the functions and features under development are free from errors, it is possible that they could contain errors, inaccuracies, and omissions. Unless otherwise provided by valid agreement, we make no warranties of any kind, either implied or express, and exclude all liability for any loss or damage suffered in connection with the use of features and functions under development, to the maximum extent permitted by law, regardless of whether such loss or damage may have been foreseeable.
- d) We are not responsible for the accessibility, safety, accuracy, availability, legality, or completeness of information, advertising, commercial offers, products, services, and materials on third-party websites and third-party resources.

# 1 Introduction

This document outlines the constellation raw measurement data and ephemeris/almanac information. The messages mentioned in this document complies to NMEA format. For more information, see [document \[1\]](#) [protocol specification](#).

This document is applicable to the following Quectel modules:

- L76
- L76-L
- L76-LB
- L96

**NOTE**

Quectel assumes no responsibility if commands other than the ones listed herein are used.

# 2 Raw Data-Related Message

## 2.1. PQRAW

Enables/disables standard NMEA message or raw data output.

**Type:**

Set/Get

**Synopsis:**

```
//Set:  
$PQRAW,W,<EnNMEA>,<EnRAW>*<Checksum><CR><LF>  
  
//Get:  
$PQRAW,R*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<EnNMEA>	Numeric	-	Enable/disable standard NMEA message output. 0 = Disable. 1 = Enable.
<EnRAW>	Numeric	-	Enable/disable standard raw data output. 0 = Disable. 1 = Enable.

**Result:**

- If successful, the module returns:

```
//Set:  
$PQRAW,W,OK*<Checksum><CR><LF>  
  
//Get:  
PQRAW,R,<EnNMEA>,<EnRAW>*<Checksum><CR><LF>
```

- If failed, the module returns:

```
$PQRAW,W,ERROR*<CR><LF>
```

**Example:**

```
//Successful setting:
```

```
$PQRAW,W,0,1*3F
```

```
$PQRAW,W,OK*16
```

```
//Unsuccessful setting:
```

```
$PQRAW,W,0,2*3C
```

```
$PQRAW,W,ERROR*4A
```

```
//Get:
```

```
$PQRAW,R*3B
```

```
$PQRAW,R,0,1*3A
```

# 3 Raw Measurement Messages

The GNSS raw data messages listed in this chapter provide the GPS/GLONASS/Galileo/BDS raw data to external Kalman filters.

**Table 1: List of GNSS Raw Measurement Messages**

Message	Type	Description
\$PMTKCHL	Output	Provides raw measurement information for each channel of GPS, GLONASS, Galileo and BDS constellations.
\$PMTKGRP	Output	Provides the group message include GPS/receiver time information.
\$PMTKVNED	Output	Provides the GPS/receiver velocity information.

## 3.1. PMTKCHL

Provides raw measurement information for each channel of GPS, GLONASS, Galileo and BDS constellations.

**Type:**

Output

**Synopsis:**

```
$PMTKCHL,<SysID>,<SatID>,<Pseudorange>,<TimeSyncCarrierPhase>,<Doppler>,<CycleSlipCount>,<SNR>,<SatPos(X)>,<SatPos(Y)>,<SatPos(Z)>,<FreqCh>,<IODE/tb>,<IonosphereCorrection>,<IonosphereSource>,<SyncStatus>,<CodePhase>,<OutputPseudorange*><Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<SysID>	Numeric	-	System ID: 0 = GPS 1 = GLONASS 2 = BDS

Field	Format	Unit	Description
			3 = Galileo
<SatID>	Numeric	-	Satellite ID.
<Pseudorange>	Numeric	Meter	Raw pseudorange measurements.
<TimeSyncCarrierPhase>	Numeric	Cycle	Raw carrier phase measurements synchronized to GPS time. If the carrier phase is unlocked, the value will be 0.000.
<Doppler>	Numeric	Hz	Doppler measurements.
<CycleSlipCount>	Numeric	-	Incremented at every cycle slip on this satellite. Range: 0–999.
<SNR>	Numeric	dB-Hz	SNR (C/N <sub>0</sub> ). Range: 00–99. Null while not tracking.
<SatPos(X)>	Numeric	Meter	ECEF coordinate system (X axis)
<SatPos(Y)>	Numeric	Meter	ECEF coordinate system (Y axis)
<SatPos(Z)>	Numeric	Meter	ECEF coordinate system (Z axis)
<FreqCh>	Numeric	-	GLONASS satellite frequency channel number. This item is only valid for GLONASS. The frequency channel number (K) equals this item minus eight.
<IODE/tb>	Hexadecimal	-	IODE is for GPS/BDS. tb is for GLONASS, null when system ID is Galileo. <ul style="list-style-type: none"> <li>● <b>IODE for GPS:</b> Range: 0x00–0xFF. No IODE: Null</li> <li>● <b>IODE for BDS:</b> Range: 0x00–0x1F. No IODE: Null</li> </ul>
<IonosphereCorrection>	Numeric	Meter	Ionosphere correction value.
<IonosphereSource>	Numeric	-	Ionosphere source. 0 = None 1 = Broadcast 2 = SBAS
<SyncStatus>	Numeric	-	GPS + BDS data synchronization status. 0 = None 1 = Bit synchronization. 2 = Subframe synchronization.

Field	Format	Unit	Description
			3 = Exact synchronization (Measurement is usable).
<CodePhase>	Numeric	-	Satellite code phase.
<OutputPseudorange>	Numeric	-	Pseudorange source. 0 = From ephemeris 1 = From almanac

**Example:**

```
$PMTKCHL,0,016,23394543.67,4992.633,-176.5,0,39,-25781982.00,1761937.12,6862459.50,00,4B,0.00,  
0,3,263.317932,0*20
```

**NOTE**

Carrier phase raw measurements of Geostationary Earth Orbit (GEO) in BDS system are not supported. In such a case, <TimeSyncCarrierPhase> and <CycleSlipCount> will be 0.000 and 999.

## 3.2. PMTKGRP

Provides the group message include GPS/receiver time information.

**Type:**

Output

**Synopsis:**

```
$PMTKGRP,<ClockTime>,<TOW>,<WN>,<ClockStatus>,<UTCOffset>,<ClockBias>,<ClockOffsetA>,<ClockOffsetB>,<TOWAcc>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<ClockTime>	Numeric	Millisecond	Local receiver time tick. Range: 0–4294967295 (2^32-1).
<TOW>	Numeric	Second	GPS time of week. Range: 0.000–00604800.000.
<WN>	Numeric	Week	GPS Week number. Range: 0–9999.

Field	Format	Unit	Description
<ClockStatus>	Numeric	-	Clock status. 0 = No clock 1 = RTC 2 = Synchronized to GPS 3 = From GPS fix
<UTCOffset>	Numeric	Second	The difference between GPS and UTC.
<ClockBias>	Numeric	Meter	Clock bias.
<ClockOffsetA>	Numeric	Meter	Clock offset between GPS clock and GLONASS clock.
<ClockOffsetB>	Numeric	Meter	Clock offset between GPS clock and BDS clock.
<TOWAcc>	Numeric	-	Time of week (TOW) accuracy. 0 = TOW accuracy exceeds 1 ms. 1 = TOW accuracy is within 1 ms.

**Example:**

```
$PMTKGRP,34995,00408979.000,1776,3,16,-76792,0,56,1*6D
```

### 3.3. PMTKVNED

Provides the GPS/receiver velocity information.

**Type:**

Output

**Synopsis:**

```
$PMTKVNED,<ClockTime>,<NorthVelocity>,<EastVelocity>,<UpVelocity>,<HorizontalSpeed>,<Speed>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<ClockTime>	Numeric	Millisecond	Local receiver time tick. Range: 0–4294967295 (2^32-1).
<NorthVelocity>	Numeric	m/s	North velocity.
<EastVelocity>	Numeric	m/s	East velocity.

Field	Format	Unit	Description
<UpVelocity>	Numeric	m/s	Up velocity.
<HorizontalSpeed>	Numeric	m/s	Horizontal ground speed.
<Speed>	Numeric	m/s	Object speed, including horizontal and vertical speeds.

**Example:****\$PMTKVNED,109057,10.00,20.00,0.00,0.00,0.00\*0C**

# 4 Ephemeris and Almanac Messages

Table 2: List of GNSS Ephemeris and Almanac Messages

Message	Type	Description
\$PMTK473	Command	Requests the ephemeris data of a single GPS satellite.
\$PMTK710	Output	Response to <b>\$PMTK473</b> , returning the requested ephemeris data for the specified GPS satellite.
\$PMTK474	Command	Requests the almanac data of a single GPS satellite.
\$PMTK711	Output	Response to <b>\$PMTK474</b> , returning the requested almanac data for the specified GPS satellite.
\$PMTK477	Command/Output	Requests the ephemeris data of a single GLONASS satellite/ Responds to GLONASS ephemeris data request.
\$PMTK478	Command/Output	Requests the almanac data of a single GLONASS satellite/ Responds to GLONASS almanac data request.
\$PMTK493	Command/Output	Requests the ephemeris data of a single BDS satellite/ Responds to BDS ephemeris data request.
\$PMTK494	Command/Output	Requests the almanac data of a single BDS satellite/Responds to BDS almanac data request.
\$PMTK668	Command/Output	Requests the GPS ephemeris data parameters/Responds to GPS ephemeris data parameter request.
\$PMTK669	Command/Output	Requests the BDS ephemeris data parameters/Responds to BDS ephemeris data parameter request.

## 4.1. PMTK473: GPS Ephemeris Request

Requests the ephemeris data of a single GPS satellite. For response message, see [Chapter 4.2 PMTK710: Response to GPS Ephemeris Request](#).

**Type:**

Command

**Synopsis:**

```
$PMTK473,<SatID>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<SatID>	Numeric	-	GPS satellite ID for ephemeris data.

**NOTE**

If the module does not have the ephemeris data of the specified GPS satellite, it will return **\$PMTK001,473,2\*31** to indicate the **\$PMTK473** message execution failure.

**Example:**

**\$PMTK473,1\*2F**

```
$PMTK710,01,0D5000,74F54E,9E2E5F,DADC08,6D7E0C,411DE2,00FFA3,D14BBE,41F667,2BCE30,  
B3BA58,F76904,F35233,0F25A1,0D0F30,1DE27D,FFD19B,E6C751,001C27,EABAAA,1F6F1F,0B6DEA  
,FFA906,41015D*1C
```

## 4.2. PMTK710: Response to GPS Ephemeris Request

Responds to **\$PMTK473**, returning the requested ephemeris data for the specified GPS satellite. It returns the most recently processed GPS ephemeris sub-frame data block, consisting of 8 words from the GPS navigation message sub-frames 1, 2 and 3 (24 words in total) following the HOW (Handover Word). The data excludes the 6 most significant parity bits. For detailed information, see the GPS Interface Control Document (ICD).

**Type:**

Output

**Synopsis:**

```
$PMTK710,<SatID>,<Data0>,...,< Data23>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<SatID>	Hexadecimal	-	GPS satellite ID.
<Data0>...<Data23>	Hexadecimal	-	GPS ephemeris data words.

**Example:**

**\$PMTK473,1\*2F**

```
$PMTK710,01,0D5000,74F54E,9E2E5F,DADC08,6D7E0C,411DE2,00FFA3,D14BBE,41F667,2BCE30,  
B3BA58,F76904,F35233,0F25A1,0D0F30,1DE27D,FFD19B,E6C751,001C27,EABAAA,1F6F1F,0B6DEA  
,FFA906,41015D*1C
```

### 4.3. PMTK474: GPS Almanac Request

Requests the almanac data of a single GPS satellite. For response message, see [Chapter 4.4 PMTK711: Response to GPS Almanac Request](#).

**Type:**

Command

**Synopsis:**

```
$PMTK474,<SatID>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<SatID>	Numeric	-	GPS satellite ID for almanac data.

**NOTE**

If the module does not have the almanac data of the specific GPS satellite, it will return **\$PMTK001,474,2\*36** to indicate the **\$PMTK474** message execution failure.

Example:

**\$PMTK474,1\*28**

**\$PMTK711,01,0835,414F51,4E1846,FD4E00,A10CA9,9BD650,1F1676,C3F101,D1FFA1\*45**

## 4.4. PMTK711: Response to GPS Almanac Request

Responds to **\$PMTK474**, returning the requested almanac data for the specified GPS satellite. It returns the most recently processed GPS almanac sub-frame data block, consisting of the almanac reference GPS week, and the 8 words following the HOW (Handover Word) from the GPS navigation message, either pages 1 to 24 of sub-frame 4 or pages 2 to 10 of sub-frame 5. The data excludes the 6 most significant parity bits. For detailed information, see the GPS ICD.

Type:

Output

Synopsis:

**\$PMTK711,<SatID>,<WN>,<Data0>,...,<Data7>\*<Checksum><CR><LF>**

Parameter:

Field	Format	Unit	Description
<SatID>	Hexadecimal	-	GPS satellite ID.
<WN>	Hexadecimal	Week	GPS week number.
<Data0>...<Data7>	Hexadecimal	-	GPS ephemeris data words.

Example:

**\$PMTK474,14\*1C**

**\$PMTK711,0E,0898,4E0CAF,7B06F8,FD4D00,A10CCC,4E8750,7B0333,C2F828,F3FFF\*4F**

## 4.5. PMTK477: GLONASS Ephemeris

### 4.5.1. Poll Request

Requests the ephemeris data of a single GLONASS satellite.

**Type:**

Command

**Synopsis:**

```
$PMTK477,<SatID>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<SatID>	Numeric	-	<p>GLONASS satellite ID for ephemeris data. Range: 1–24.</p> <p>Note: &lt;SatID&gt; is different from GSV/GSA message. If the satellite ID in GSV/GSA messages is used, it should be minus 64.</p>

**NOTE**

If the module does not have the ephemeris data of the specified GLONASS satellite, it will return **\$PMTK001,477,2\*35** to indicate the **\$PMTK477** message execution failure.

**Example:**

```
$PMTK477,20*18
$PMTK477,14,951F898C,3104034D,00000005,11AA4E13,20AAA097,00000015,8260CD08,061FD474,
00000040,02658FD1,59ACA000,00000004,23800068,E0000003,00000063,4F531686,A*74
```

### 4.5.2. Response

Responds to GLONASS ephemeris data request. It returns the most recently processed GLONASS ephemeris sub-frame data block.

**Type:**

Output

**Synopsis:**

```
$PMTK477,<SatID>,<Data0>,...,<Data14>,<GPS_Time>,<ChannelNum>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Description
<SatID>	Hexadecimal	GLONASS satellite ID.
<Data0>...<Data14>	Hexadecimal	GLONASS ephemeris data words.
<GPS_Time>	Hexadecimal	GPS time when this ephemeris message is saved. Starting from January 6, 1980. Unit: Second.
<ChannelNum>	Hexadecimal	GLONASS channel number plus 8.

The structure of GLONASS ephemeris raw data is illustrated below. For more details, see GLONASS ICD.

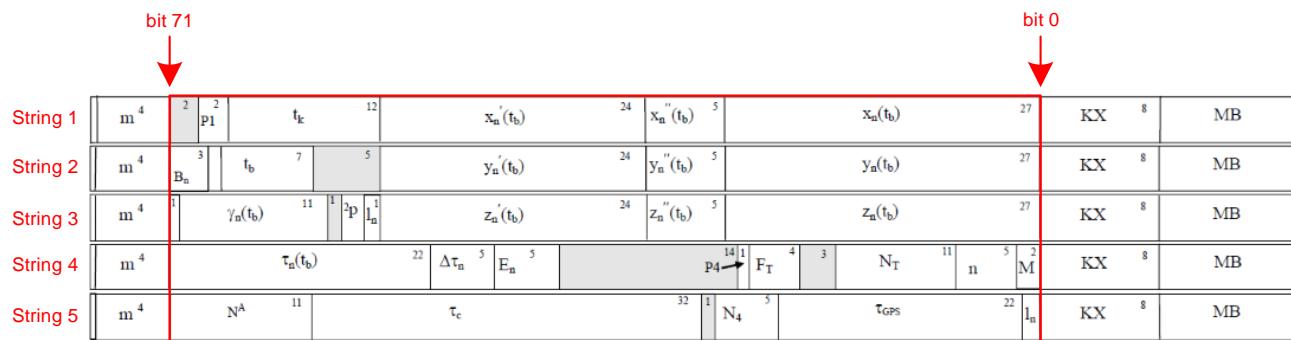

Figure 1: GLONASS Ephemeris Raw Data

**Structure Introduction:**

Each <DataN> field contains 32-bit data, every 3 <DataN> fields make up a string.

<Data0> to <Data2> make up string 1, <Data0> contains bit 0–31 of string 1, <Data1> contains bit 32–63 of string 1, <Data2> contains bit 64–71 of string 1. (The last 8-bit of <Data2> is valid.)

<Data3> to <Data5> make up string 2, <Data3> contains bit 0–31 of string 2, <Data4> contains bit 32–63 of string 2, <Data5> contains bit 64–71 of string 2. (The last 8-bit of <Data5> is valid.)

...

<Data12> to <Data14> make up string 5, <Data12> contains bit 0–31 of string 5, <Data13> contains bit 32–63 of string 5, <Data14> contains bit 64–71 of string 5. (The last 8-bit of <Data14> is valid.)

**Example:**

```
$PMTK477,06,06A6C7DD,C411177E,00000006,093985C3,E0897A34,00000016,81153FC2,06347F63,  
00000080,02603419,72E06000,0000008B,8380005C,E0000000,0000000C,4BBF053E,4*79
```

The bit 71–0 of string 1 is **06 C411177E 06A6C7DD**.

The bit 71–0 of string 2 is **16 E0897A34 093985C3**.

The bit 71–0 of string 3 is **80 06347F63 81153FC2**.

The bit 71–0 of string 4 is **8B 72E06000 02603419**.

The bit 71–0 of string 5 is **0C E0000000 8380005C**.

## 4.6. PMTK478: GLONASS Almanac

### 4.6.1. Poll Request

Requests the almanac data of a single GLONASS satellite.

**Type:**

Command

**Synopsis:**

```
$PMTK478,<SatID>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<SatID>	Numeric	-	GLONASS satellite ID for almanac data. Range: 1–24. Note: <SatID> is different from GSV/GSA message. If the satellite ID in GSV/GSA messages is used, it should be minus 64.

**NOTE**

If the module does not have the almanac data of the specified GLONASS satellite, it will return **\$PMTK001,478,2\*3A** to indicate the **\$PMTK478** message execution failure.

**Example:**

```
$PMTK478,22*15
```

```
$PMTK478,16,21F70953,0B3492D8,000000B6,97FB82BA,7300F746,00000007*6A
```

#### 4.6.2. Response

Responds to GLONASS almanac data request. It returns the most recently processed GLONASS almanac sub-frame data block.

**Type:**

Output

**Synopsis:**

```
$PMTK478,<SatID>,<Data0>,...,<Data5>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<SatID>	Hexadecimal	-	GLONASS satellite ID.
<Data0>...<Data5>	Hexadecimal	-	GLONASS almanac data words.

The structure of GLONASS almanac raw data is illustrated below. For more details, see GLONASS ICD.

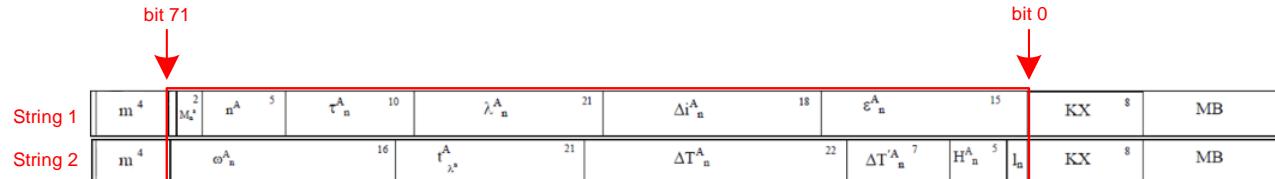

Figure 2: GLONASS Almanac Raw Data

#### Structure Introduction:

Each <DataN> field contains 32-bit data, every 3 <DataN> fields make up a string.

<Data0> to <Data2> make up string 1, <Data0> contains bit 0–31 of string 1, <Data1> contains bit 32–63 of string 1, <Data2> contains bit 64–71 of string 1. (The last 8-bit of <Data2> is valid.)

<Data3> to <Data5> make up string 2, <Data3> contains bit 0–31 of string 2, <Data4> contains bit 32–63 of string 2, <Data5> contains bit 64–71 of string 2. (The last 8-bit of <Data5> is valid.)

#### Example:

```
$PMTK478,16,21F70953,0B3492D8,000000B6,97FB82BA,7300F746,00000007*6A
```

The bit 71–0 of string 1 is **B6 0B3492D8 21F70953**.

The bit 71–0 of string 2 is **07 7300F746 97FB82BA**.

## 4.7. PMTK493: BDS Ephemeris

### 4.7.1. Poll Request

Requests the ephemeris data of a single BDS satellite.

**Type:**

Command

**Synopsis:**

```
$PMTK493,<SatID>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<SatID>	Numeric	-	BDS satellite ID for ephemeris data.

**NOTE**

If the module does not have the ephemeris data of the specified BDS satellite, it will return **\$PMTK001,493,2\*3F** to indicate the **\$PMTK493** message execution failure.

**Example:**

**\$PMTK493,2\*22**

```
$PMTK493,02,3BD20500,907702C4,15,4EDB2107,817FBA46,55,00000000,17BDDB00,D5,00804BE4  
,6B428B56,55,D0F906E4,001C28FF,55,2B2B57CA,FFC34BAE,55,477900F3,117A8078,55,90876103,  
5FFF8542,95,9A11F056,F55447FC,55,AA0A3DB0,AAAAAAA,AA*65
```

**\$PMTK493,6\*26**

```
$PMTK493,06,B44740E2,48174008,FB5018F6,D2370702,609F3011,2C001141,05A60188,B48740E2,  
FDAF4A20,3B4A311E,7AC50469,7E2915CA,43EBCFCF,0011A72B,B4C740E2,3431EC39,FCD78D4A  
,E0D1FFD3,BB7F0201,D192C3E7,4616B84B*47
```

#### 4.7.2. Response

Responds to BDS ephemeris data request. It returns the most recently processed BDS ephemeris sub-frame data block. For MEO/IGSO satellites, the data consists of 7 words from the BDS navigation message sub-frames 1, 2 and 3 (21 words in total). For GEO satellites, the data is extracted from pages 1–10 of sub-frame 1 following the Pnum1 (see [Figure 3: Bit Allocation for 150 MSBs of Page 1 of Subframe 1 in Format D2](#) for details). All parity-bits from the navigation message have been removed.

**Type:**

Output

**Synopsis:**

```
//MEO/IGSO satellites
$PMTK493,<SatID>,<Data0>,...,<Data20>*<Checksum><CR><LF>
//GEO satellites
$PMTK493,<SatID>,<Page1A>,<Page1B>,<Page1C>,...,<Page10A>,<Page10B>,<Page10C>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<SatID>	Hexadecimal	-	BDS satellite ID.
<Data0>...<Data20>	Hexadecimal	-	BDS ephemeris data words.
<PageNA>	Hexadecimal	-	The first 32 bits of page N data.
<PageNB>	Hexadecimal	-	The second 32 bits of page N data.
<PageNC>	Hexadecimal	-	The third 8 bits of page N data.

For details on the structure of BDS ephemeris raw data for MEO/IGSO satellites and GEO Satellites, see BDS ICD. Below is a brief illustration on the data structure for GEO satellites:

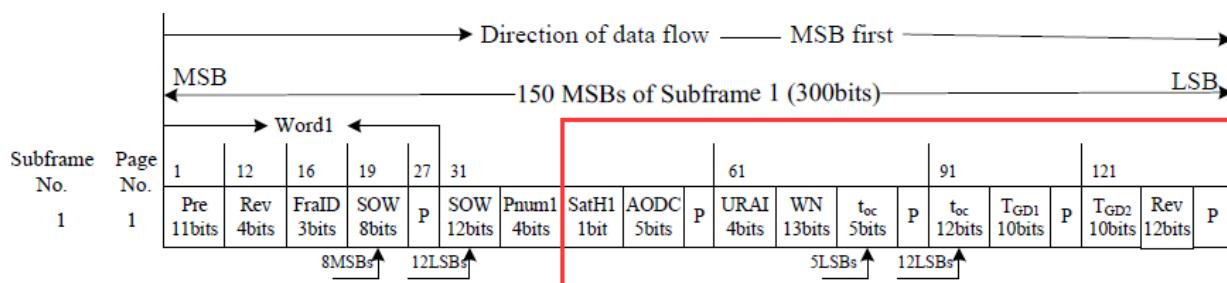

Figure 3: Bit Allocation for 150 MSBs of Page 1 of Subframe 1 in Format D2

Page1                          Page2                          Page10

```
$PMTK493,02,3BD20500,907702C4,15,4EDB2107,817FBA46,55,...,AA0A3DB0,AAAAAAA,AA*65
```

Figure 4: GEO Satellite Ephemeris Corresponding to Each Page

## 4.8. PMTK494: BDS Almanac

### 4.8.1. Poll Request

Requests the almanac data of a single BDS satellite.

**Type:**

Command

**Synopsis:**

```
$PMTK494,<SatID>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Description
<SatID>	Numeric	BDS satellite ID for almanac data.

**NOTE**

If the module does not have the almanac data of the specified BDS satellite, it will return **\$PMTK001,494,2\*38** to indicate the **\$PMTK494** message execution failure.

**Example:**

```
$PMTK494,2*25
$PMTK494,02,02E8,B10741E2,AD2B0B80,EB9BFC6B,1A409522,9823A008,B3E1FE00,E1A822ED*65

$PMTK494,6*21
$PMTK494,06,02E8,B24741E2,A52BABAC,FF8F0000,62E2F88C,9FCB1138,8D9722FD,CDA2B5FC*
61
```

#### 4.8.2. Response

Responds to BDS almanac data request. It returns the most recently processed BDS almanac sub-frame data block, namely, the almanac reference BDS week, followed by the 7 words from the BDS navigation message broadcasted on pages 1 to 24 of sub-frame 4 and pages 1 to 6 of sub-frame 5 for MEO/IGSO satellites and broadcasted on pages 35 to 36 of sub-frame 5 for GEO satellites. All parity bits have been removed.

**Type:**

Output

**Synopsis:**

```
$PMTK494,<SatID>,<WN>,<Data0>,...,<Data6>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Description
<SatID>	Hexadecimal	BDS satellite ID.
<WN>	Hexadecimal	BDS week number.
<Data0>...<Data6>	Hexadecimal	BDS almanac data words.

**NOTE**

For details on the structure of BDS almanac raw data for MEO/IGSO satellites and GEO Satellites, see BDS ICD.

#### 4.9. PMTK668: GPS Ephemeris Parameters

##### 4.9.1. Poll Request

Requests the GPS ephemeris data parameters.

**Type:**

Command

**Synopsis:**

```
$PMTK668,<SatID>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Description
<SatID>	Numeric	GPS satellite ID.

**NOTE**

If the module does not have the parameters of the specified GPS satellite, it will return \$PMTK668,<SatID>,0\*<Checksum><CR><LF>.

**Example:**

\$PMTK668,1\*27

\$PMTK668,1,1077,0,87,65,7650,0,-93,-765201,65,-2457,11214,817085016,-2199,83055155,3877,2701  
987632,7650,-47,-1679374511,28,669694634,8047,520842730,-22266,12,0\*08

**4.9.2. Response**

Responds to GPS ephemeris data parameter request. It returns the GPS ephemeris data parameters.

**Type:**

Output

**Synopsis:**

\$PMTK668,<SatID>,<WN>,<URAI>,<IDOT>,<IDOE>,<t<sub>oc</sub>>,<af2>,<af1>,<af0>,<IODC>,<C<sub>rs</sub>>,<Δn>,<M<sub>0</sub>>,<C<sub>uc</sub>>,<Eccentricity>,<C<sub>us</sub>>,< $\sqrt{A}$ >,<t<sub>oe</sub>>,<C<sub>ic</sub>>,<Ω<sub>0</sub>>,<C<sub>is</sub>>,<i<sub>0</sub>>,<C<sub>rc</sub>>,<ω>,<Ω<sub>dot</sub>>,<T<sub>gd</sub>>,<SVHealth>\*<Checksum><CR><LF>

**Parameter:**

Field	Format	Unit	Description
<SatID>	Numeric	-	GPS satellite ID.
<WN>	Numeric	Week	GPS week number.
<URAI>	Numeric	-	User range accuracy index.
<IDOT>	Numeric	$2^{-43}$ π/sec	Rate of Inclination Angle.
<IDOE>	Numeric	-	Issue of data, ephemeris.
<t <sub>oc</sub> >	Numeric	$2^4$ sec	Time of clock.

Field	Format	Unit	Description
<af2>	Numeric	$2^{-55}$ sec/sec <sup>2</sup>	Drift Rate Correction Coefficient.
<af1>	Numeric	$2^{-43}$ sec/sec	Space Vehicle (SV) Clock Drift Correction Coefficient.
<af0>	Numeric	$2^{-31}$ sec	SV Clock Bias Correction Coefficient.
<IODC>	Numeric	-	Issue of Data, Clock.
<C <sub>rs</sub> >	Numeric	$2^{-5}$ meter	Amplitude of the Sine Harmonic Correction Term to the Orbit Radius.
<Δn>	Numeric	$2^{-43}$ π/sec	Mean Motion Difference from Computed Value.
<M <sub>0</sub> >	Numeric	$2^{-31}$ π	Mean Anomaly at Reference Time.
<C <sub>uc</sub> >	Numeric	$2^{-29}$ rad	Amplitude of Cosine Harmonic Correction Term to the Argument of Latitude.
<Eccentricity>	Numeric	$2^{-33}$	Eccentricity.
<C <sub>us</sub> >	Numeric	$2^{-29}$ rad	Amplitude of Sine Harmonic Correction Term to the Argument of Latitude.
< $\sqrt{A}$ >	Numeric	$2^{-19}$ meter <sup>1/2</sup>	Square Root of the Semi-Major Axis.
<t <sub>oe</sub> >	Numeric	$2^4$ sec	Time of Ephemeris.
<C <sub>ic</sub> >	Numeric	$2^{-29}$ rad	Amplitude of the Cosine Harmonic Correction Term to the Angle of Inclination.
<Ω <sub>0</sub> >	Numeric	$2^{-31}$ π	Longitude of Ascending Node of Orbit Plane at Weekly Epoch.
<C <sub>is</sub> >	Numeric	$2^{-29}$ rad	Amplitude of the Sine Harmonic Correction Term to the Angle of Inclination.
<i <sub>0</sub> >	Numeric	$2^{-31}$ π	Inclination angle at reference time.
<C <sub>rc</sub> >	Numeric	$2^{-5}$ meter	Amplitude of the Cosine Harmonic Correction Term to the Orbit Radius.
<ω>	Numeric	$2^{-31}$ π	Argument of Perigee.
<Ω <sub>dot</sub> >	Numeric	$2^{-43}$ π/sec	Rate of right ascension.
<T <sub>gd</sub> >	Numeric	$2^{-31}$ sec	Group Delay Differential.
<SVHealth>	Numeric	-	SV health status.

## 4.10. PMTK669 BDS: Ephemeris Parameters

### 4.10.1. Poll Request

Requests the BDS ephemeris data parameters.

**Type:**

Command

**Synopsis:**

```
$PMTK669,<SatID>*<Checksum><CR><LF>
```

**Parameter:**

Field	Format	Description
<SatID>	Numeric	BDS satellite ID.

**NOTE**

If the module does not have the parameters of the specified BDS satellite, it will return  
**\$PMTK669,<SatID>,0\*<Checksum><CR><LF>.**

**Example:**

**\$PMTK669,1\*26**

```
$PMTK669,1,1077,0,-816,2,16200,0,40730,-5227056,0,-15255,21444,-564748513,-17301,4677831,-5582,  
3404452729,16200,369,172423346,155,60460899,5163,-13124251,-18181,-5,0*01
```

### 4.10.2. Response

Responds to BDS ephemeris data parameter request. It returns the BDS ephemeris data parameters.

**Type:**

Output

**Synopsis:**

```
$PMTK669,<SatID>,<WN>,<URAI>,<IDOT>,<IDOE>,<toc>,<a2>,<a1>,<a0>,<IODC>,<Crs>,<Δn>,<M0>,  
<Cuc>,<Eccentricity>,<Cus>,<√A>,<toe>,<Cic>,<Ω0>,<Cis>,<i0>,<Crc>,<ω>,<Ωdot>,<Tgd>,<SVHealth>*<Che  
cksum><CR><LF>
```

**Parameter:**

Field	Format	Unit	Description
<SatID>	Numeric	-	BDS satellite ID.
<WN>	Numeric	Week	GPS week number. Note: <WN> is the GPS week number in both \$PMTK668 and \$PMTK669 output messages.
<URAI>	Numeric	-	User range accuracy index
<IDOT>	Numeric	$2^{-43} \pi/\text{sec}$	Rate of inclination angle.
<IODE>	Numeric	-	Issue of data, ephemeris.
<t <sub>oc</sub> >	Numeric	$2^3 \text{ sec}$	Time of clock.
<a <sub>2</sub> >	Numeric	$2^{-66} \text{ sec/sec}^2$	Drift Rate Correction Coefficient.
<a <sub>1</sub> >	Numeric	$2^{-50} \text{ sec/sec}$	Space Vehicle (SV) Clock Drift Correction Coefficient.
<a <sub>0</sub> >	Numeric	$2^{-33} \text{ sec}$	SV Clock Bias Correction Coefficient.
<IDOC>	Numeric	-	Issue of Data, Clock.
<C <sub>rs</sub> >	Numeric	$2^{-6} \text{ meter}$	Amplitude of the Sine Harmonic Correction Term to the Orbit Radius.
<Δn>	Numeric	$2^{-43} \pi/\text{sec}$	Mean Motion Difference from Computed Value.
<M <sub>0</sub> >	Numeric	$2^{-31} \pi$	Mean Anomaly at Reference Time.
<C <sub>uc</sub> >	Numeric	$2^{-31} \text{ rad}$	Amplitude of Cosine Harmonic Correction Term to the Argument of Latitude.
<Eccentricity>	Numeric	$2^{-33}$	Eccentricity.
<C <sub>us</sub> >	Numeric	$2^{-31} \text{ rad}$	Amplitude of Sine Harmonic Correction Term to the Argument of Latitude.
<√A>	Numeric	$2^{-19} \text{ meter}^{1/2}$	Square Root of the Semi-Major Axis.
<t <sub>oe</sub> >	Numeric	$2^3 \text{ sec}$	Time of Ephemeris.
<C <sub>ic</sub> >	Numeric	$2^{-31} \text{ rad}$	Amplitude of the Cosine Harmonic Correction Term to the Angle of Inclination.
<Ω <sub>0</sub> >	Numeric	$2^{-31} \pi$	Longitude of ascending node of orbital of plane computed according to reference time.
<C <sub>is</sub> >	Numeric	$2^{-31} \text{ rad}$	Amplitude of the Sine Harmonic Correction Term to the Angle of Inclination.

Field	Format	Unit	Description
< $i_0$ >	Numeric	$2^{-31} \pi$	Inclination angle at reference time.
< $C_{rc}$ >	Numeric	$2^{-6}$ meter	Amplitude of the Cosine Harmonic Correction Term to the Orbit Radius.
< $\omega$ >	Numeric	$2^{-31} \pi$	Argument of Perigee.
< $\Omega_{dot}$ >	Numeric	$2^{-43} \pi/\text{sec}$	Rate of right ascension.
< $T_{gd}$ >	Numeric	0.1ns	Group Delay Differential.
<SVHealth>	Numeric	-	SV health status.
